

The purpose of this website is to encourage you to take up a course in the Federal Polytechnic, Ilaro and to help you select the course most appropriate to your needs. The polytechnic is able to fulfil the objective of educating and training people for industry, commerce, the professions and community services by offering courses that are highly relevant to the world of work.

We are pleased that we are able to provide opportunities to study courses in Applied Science and Technology, Engineering, Environmental Studies, and Management Studies. All our courses are carefully designed to be stimulating, intellectually challenging and are accredited by the National Board for Technical Education. In addition, the delivery of the curriculum is subject to the judgement of professional bodies, external scholars and experts in the industry in the particular field they cover.

We believe that the industrial work experience scheme, field work and study tours which are an integral part of all the courses in Applied Science, Engineering and Environmental Studies give our students an additional insight into the courses of their choice such that at the end of their study they are better able to apply their knowledge in their chosen careers.

In addition, to giving details to our courses, the website also highlights the important academic resources and services we provide for our students to assist them in their academic work. The polytechnic provides a variety of student services and standard facilities for sports and recreation, medical care and worshipping on campus, among others. We like to feel that our students work hard, are well supported and at the same time enjoy their academic life. Vital information contained in this website will afford students the opportunity to study and read ahead of their lecture schedules.

The institution is sufficiently large with 4,000 full-time and 2,000 part-time students and 1,000 academic and non-academic staff to have its own social life. Well-landscaped and beautiful lawns provide a serene environment very conducive to learning. Sufficiently furnished club house, guest house and a number of registered social clubs on campus add flavour and value to the social life on campus. At the same time, we are near the centre of a medium-populated ancient town of Ilaro and are therefore able to share the life of the community. Also, social life of the two capital cities of Ogun and Lagos States which only a few kilometres away spill over to Ilaro.

I am confident; therefore, that we have a course that meets your particular need, so can play a part in your plans for the future with which I wish you every success. I very much hope that you will pursue your interest in coming to the Federal Polytechnic, Ilaro. If you do come you will be very welcome as a member of our academic community. I know you will find the polytechnic interesting, challenging and a very exciting place to be. Certainly, it will be a rewarding and worthwhile stay in the ancient town of Ilaro.

As you join us, we welcome you to the World of the Federal Polytechnic, Ilaro citadel of learning with class.

Dr. R.A. Oloyo, Rector
